Tutorial..... 1

1. Regular Expression Tutorial	3
2. Literal Characters.....	5
3. First Look at How a Regex Engine Works Internally	7
4. Character Classes or Character Sets.....	9
5. The Dot Matches (Almost) Any Character	13
6. Start of String and End of String Anchors.....	15
7. Word Boundaries.....	18
8. Alternation with The Vertical Bar or Pipe Symbol	21
9. Optional Items	23
10. Repetition with Star and Plus	24
11. Use Round Brackets for Grouping.....	27
12. Named Capturing Groups	31
13. Unicode Regular Expressions.....	33
14. Regex Matching Modes	42
15. Possessive Quantifiers	44
16. Atomic Grouping.....	47
17. Lookahead and Lookbehind Zero-Width Assertions.....	49
18. Testing The Same Part of a String for More Than One Requirement	52
19. Continuing at The End of The Previous Match.....	54
20. If-Then-Else Conditionals in Regular Expressions	56
21. XML Schema Character Classes	59
22. POSIX Bracket Expressions	61
23. Adding Comments to Regular Expressions.....	65
24. Free-Spacing Regular Expressions.....	66

Examples..... 67

1. Sample Regular Expressions	69
2. Matching Floating Point Numbers with a Regular Expression	72
3. How to Find or Validate an Email Address.....	73
4. Matching a Valid Date	76
5. Matching Whole Lines of Text.....	77
6. Deleting Duplicate Lines From a File	78
8. Find Two Words Near Each Other.....	79
9. Runaway Regular Expressions: Catastrophic Backtracking.....	80
10. Repeating a Capturing Group vs. Capturing a Repeated Group	85

Tools & Languages..... 87

1. Specialized Tools and Utilities for Working with Regular Expressions	89
2. Using Regular Expressions with Delphi for .NET and Win32.....	91
